

**A case where beauty and comfort
are really more than skin deep.**

A superior pool finish performs in many ways. DURAZZO pool finishes create a rugged, aesthetic and exceptionally smooth surface to transform your pool into an elegant display of natural beauty.

DURAZZO uses the natural beauty of marble aggregates along with non-fading colored quartz to radiate a pageantry of colors. This 'top shelf' finish elevates your pool into a spectacular setting that will not only weather the roughest pool environment but will extend your years of use and delight.

DURAZZO®

Polished Marble Pool Finish

From the Makers of **DIAMOND BRITE®**

**Transform
Your Pool into
Everlasting Beauty.**

DURAZZO® is a state-of-the-art, pre-blended pool finish designed to provide an exceptionally smooth, colorful and long lasting finish. Durazzo's unique formulation of the whitest marble aggregates, highest quality color quartz, Portland cement and performance enhancing admixtures is resistant to common pool plaster problems like spot etching, staining and discoloration.

Durazzo Pool Surfaces Extend Everlasting Beauty to Every Poolscape.

Beauty that stands the test every time.

Traditional pool plasters are quickly deteriorated by harsh chemical environments. Spot etching, staining and discoloration quickly destroy these average pool surfaces marring their original beauty. DURAZZO pool finishes however, perform where normal pool plasters fail, resisting time and chemical elements.

Safety Zone

The beauty of a Durazzo pool finish is more than skin deep. You'll feel secure knowing our surfaces are slip resistant and safe on both the feet and swimsuits.

DURAZZO uses premium marble aggregates that are finer than pebble surfaces. Your feet will love it! And when safety is paramount you will relax knowing DURAZZO is a non-skid and gentle finish.

User Friendly

DURAZZO had the user in mind when creating the premium marble aggregate surface. Maintenance was made a top priority.

The impenetrable quartz within a DURAZZO pool surface opposes stains and etching that are the result of harsh pool chemicals.

DURAZZO finishes are user friendly. Unlike traditional plaster surfaces, DURAZZO pools naturally fights off stains and chemicals that can damage your pools finish.

DURAZZO's premium marble aggregates and its high quality colored quartz create lasting beauty. Even performance enhancing cement is used to strengthen the finish by increasing hardness, reducing water permeation and strengthening the bonding. This combination of superior products and application is the cornerstone of DURAZZO's extravagantly beautiful and durable pool finishes.

Sample colors are as accurate as modern printing can produce. The color of your pool may vary due to water depth, lighting conditions at jobsite, mixing & installation methods. Sample colors are shown as wet.
