

Grouts

Performance, versatility and variety provide a quality job

Security Polymer Grout
A polymer modified Portland Cement based grout designed to be used with all types of tile in joints from 1/8" to 5/8". Eliminates the need for liquid additives with recent polymer innovations.

EGS Mortar and Grout System
This system is a water-cleanable, three component, mortar and grout system designed for setting and grouting ceramic tile and pavers over a wide variety of substrates. EGS yields exceptionally high strengths, chemical and stain resistance.

Dry Set (Unsanded) Polymer Modified Grout
Designed to be used in grout joints 1/8" wide or less when installing porous bodied tiles, marble or granite.

Quarry Grade (AR) Commercial Portland Cement Grout

Proven blends of the highest quality graded silicas, Portland Cement, colorfast pigments and other special proprietary ingredients. To be used where grout joints are 1/8" or larger when installing quarry, ceramic tile or brick pavers requiring large grout joints.

Cleaners & Sealers

Formulated to ensure a strong finish against the elements

SGM offers a full line of GROUT, TILE & STONE CARE PRODUCTS - aimed at cleaning and sealing grout, tile and stone. These contractor's choice products are effective formulas that prevent other contaminants from destroying the surface. This line of Cleaners & Sealers simplifies maintenance and helps floors & walls retain it's natural beauty longer.

- Tile & Grout Cleaner
- Safe Clean Crystals
- Epoxy Haze & Sealer Remover
- Heavy Duty Tile & Grout Cleaner
- High Gloss Sealer
- Polish Sealer
- Stone Sealer
- Grout Sealer
- Clear Penetrating Sealer & Grout Release

Guarantee
Southern Grouts & Mortars is a licensed manufacturer of the Tile Council of America and is an active member of the Ceramic Tile Distribution Association, National Tile Contractors Association, Materials & Methods Standards Association, Floor Installation Association of North America, San Diego Tile Contractors Association and the Ceramic Tile Institute of America.

Seminars
We offer technical training seminars for the trade as well as technical, hands-on interactive presentations for architects and specifiers, and job site inspections. SGM also offers AIA-CEU classes. Please contact us for more information.

Support
Offering a comprehensive line of installation systems is only the beginning. We offer Electronic Data Interchange (EDI) as well as technical and marketing support to help distributors increase their business. Marketing and technical materials such as product catalogs, color selectors, point-of-purchase displays, three part master specifications on CD-ROM will assist in easily selecting the correct product suited for each installation.

In addition, Southern Grouts & Mortars understands the importance of having qualified knowledgeable technical support and customer assistance. Our staff advises architects, engineers and contractors in the preparation of detailed methods including assisting with specification writing, recommendation of installation materials and detailing the features and benefits of SGM products. Customer and Technical assistance is just a phone call away 800-641-9247. You can also visit our web site at www.sgm.cc to learn about new innovations, technical support, e-mail and product information.

Installation Systems for Ceramic Tile and Dimension Stone

No matter what the surface, SGM is a solid foundation you can build on

We exceed Industry standards, to deliver the quality you come to expect, from start to finish. Southern Grouts & Mortars, Inc. is a single-source manufacturer of installation systems for ceramic tile and dimension stone, and the floor covering industry. From state-of-the-art surface preparation products such as feather-edge patching compounds to a myriad of advanced polymer-modified mortars, grouts, cleaners, sealers, waterproofing and crack isolation systems, SGM can satisfy your product needs to ensure successful installations for all types of construction.

Dedication and Experience...

For over 30 years, SGM has understood the specific product needs of their customers and has maintained a commitment to quality, innovation and customer service. Our extensive experience with the industry has given us the ability to recognize and serve the individual needs of our clients around the world. We are committed to achieving the highest quality standards in all aspects of our business operations: manufacturing, marketing, research and development, and customer service.

Surface Preparation

Highly efficient materials are the basis of any installation

SGM 815 Self Leveling Underlayment
A cement based pourable self-leveling underlayment that can be used to smooth and level over concrete, wood, terrazzo and existing ceramic tiles.

Southcrete 60 Sound Control Underlayment
A scientifically designed underlayment, which muffles floor impact noises and reduces sound transmission through hard tile and hard floor surfaces. Meets ASTM E989-89 and ASTM E492-90 with an IIC rating of 60 for Impact Insulation Class; and ASTM E90-90 with an STC rating of 60 for Sound Transmission Class.

Southcrete 1100 Crack Suppression & Waterproofing Kit
A two-part, trowelable, cementitious thin load-bearing waterproofing membrane system designed for use under thin-set and thick bed mortar installations.

SGM 833 Floor Mud
A factory blend of Portland Cement, graded silicas and additives, developed to produce a suitable dense substrate for ceramic tile and dimension stone.

SGM 821 Sill and Wall Mud-Light Weight Plaster Substrate
A factory blend of Portland Cement, sand and lightweight fillers. Designed for use as a light weight plaster substrate bedding (brown coat).

Easy Float Floor and Wall Mix
Ready to use, pre-mixed setting beds for ceramic tile and dimension stone.

Southcrete 1132 ONE PART LIQUID ANTI-FRACTURE & WATERPROOFING MEMBRANE

Southcrete 1132 is a single-component, water-based, brush or roller applied thin, load bearing liquid membrane. For use under thin set and thick bed mortar applications as a waterproof or anti-fracture membrane. The elastometric properties help reduce the risk of substrate cracks transferring above to the hard surface flooring. Southcrete 1132 is suitable for use under ceramic tile, dimension stone, vinyl tile, rubber tile, brick, parquet, and strip wood. Southcrete 1132 waterproof produces a continuous moisture barrier with outstanding adhesion to concrete slabs, concrete block, cured Portland cement mortar beds, cementitious tile backer board, and exterior grade plywood.

Conforms to: ANSI 118.10 - Load bearing, bonding, waterproof membranes for thin-set ceramic tile and dimension stone installation; ANSI 118.12 - Crack Isolation membranes for thin-set ceramic tile and dimension stone installation.

Installation

Dynamically engineered materials to last a lifetime

SGM offers a wide variety of quality installation products for every step of the way. Each product serves a specific purpose in the installation process and is designed to give you the precise performance needed for your specific project. In short, SGM takes you from the beginning to the end of the installation process, putting your individual needs first.

Flex Set Multi-Purpose Thin-Set Mortar

Ultra-Crete Multi-Purpose Thin-Set Mortar

Multi-Crete Multi-Purpose

Marble Set

Glass Block Mortar

Southcrete 25 Acrylic Mortar Additive

Southcrete 28 Flexible Mortar Additive

Southcrete 30 High Strength Mortar Admix

Southcrete 40 Polymer Additive (Crete Admix)

Southcrete 1200 Elastomeric Mortar & Anti-Fracture Membrane

Southcrete 501 Marble Adhesive

Southcrete 580 Multi-Purpose Mastic Type 1

Southcrete 555 Wall & Floor Adhesive

Contractor's Choice Floor & Wall Adhesive - Southcrete 525

Kwik Set Acrylic Thin-Set & Grout Admix

Multi-Lite Polymer-Modified Lightweight Mortar

Multi-Lite is a unique super polymer-modified, multi-purpose cement mortar utilizing new Nanotechnology. This new technology is approximately 40% lighter than conventional mortars and provides the same coverage as 50 pounds of traditional mortars. Designed for installing all types of tiles over a variety of substrates, Multi-Lite may be used for either floors or walls in both interior and exterior applications where a Latex-Portland Cement Mortar is required to meet the most demanding installations that meet or exceed ANSI 118.4 & 118.11 specifications.
